BOOK MARGIN GUIDE: turn your textbook into your exam cheat-sheet

Open-book exam: you may carry only the book, so everything important must be findable in 10 seconds.

What you need tonight	Highlighter code (use consistently)	Sticky-tab code
4 highlighters (yellow, green, pink, blue) · 1 fine black pen + 1 red pen · ~45 sticky tabs in 6 colours · this guide + the study deck	**YELLOW** = definitions (exact words to quote) **GREEN** = lists & frameworks (the '3 ways', '5 causes') **PINK** = Indian / company examples (Satyam, TCS, HCL) **BLUE** = research numbers (30%, 61%, +21% profit)	**BLUE** = M1 · **GREEN** = M2 · **PURPLE** = M3 · **ORANGE** = M4 · **TEAL** = M5 **RED** = 3-step approach (p.21) & Organizing Framework (p.27) **YELLOW** = your handwritten case-note pages Write the topic on each tab (e.g. 'Herzberg 174')

1. Don't read the book cover to cover. For each page in the tables below, do only what the row says: highlight, write the margin note, and tab. Rows marked SKIP need nothing (about 40% of the pages).

2. Margin notes = links to cases. Examiners reward applying theory to cases, so beside each theory write the case fact that proves it (e.g. next to Herzberg: 'Orix: pay = hygiene; retreats = motivator').

3. Use the end-of-chapter pages as notebooks. 'What Did I Learn?' and end-case pages aren't examinable, so their margins hold your case summaries (see the COPY BLOCKS at the end of this guide). That way R1, R2, R3, Prudence, Yelp, Orix and Southwest are all inside the book.

4. Inside front cover = master index. Copy the index box below onto the inside front cover (or the first blank page).

5. Before the exam, confirm the rules: handwriting in the book is allowed (you said so). Ask whether sticky tabs and loose sticky notes are allowed; if loose notes aren't, write everything directly on the pages.

Time: Ch 1 ~45 min · Ch 2 ~60 min · Ch 3.5-3.6 ~20 min · Ch 4.1-4.3 ~30 min · Ch 5 ~75 min · Ch 7 ~40 min · copy blocks ~40 min.

COPY ONTO THE INSIDE FRONT COVER: master index

Write small but neat. This is the first thing you open in the exam.

COPY BLOCKS: write these into the end-of-chapter pages

These are the case & reading facts that are NOT in the textbook. Shorten freely; keep the bold keywords.

Ch 1 note pages (pp. 36-40)

R1 Indiana Dept. of Revenue (Austrom 2024): Crisis 2011-12: $526M tax errors, 'accuracy sacrificed for speed'; fear culture (time clocks, locked doors). Leaders Krupp & Grennes: Respect-Trust-Caring, people as people. SCHEIN 3 levels: artifacts (unlocked doors, photos, removed petty rules) / espoused values (Pyramid of Excellence; 7 values incl. FUN) / assumptions (taxpayers -> customers, distrust -> trust). PFEFFER 7: security, selective hiring, training, info sharing, teams, reduced status, contingent pay (not possible -> intrinsic: autonomy, mastery, purpose). HEIFETZ: technical vs adaptive change. Results: NextDOR on time/budget 5 yrs; >90% customer sat; Top-100 US workplace 2023.

R2 Destructive behaviours (Carucci 2019): Will (reward system) + way (prefrontal cortex) not enough when behaviour rooted in trauma (amygdala). 4 steps: write origin stories; identify inner narrative; name the need it serves; choose new narrative. Andy: stutter/ADHD -> 'must hide that I'm stupid' -> talks, must be right; need = belong by being me; new = 'liked, smart, safe even in silence'.

Handouts (not in book): Behavioural problems: indiv/group/org; OBSERVE-IDENTIFY-DIAGNOSE-INTERVENE-FOLLOW UP; diagnosis not blame. Starbucks Alex: task-only, public criticism -> silence, blame, quits; 8 skills; dashboard (business+people+team+leadership). Infosys (Lex, InfyMe, WIN, C-LIFE, NASDAQ) vs Jet Airways (poor comms, unfair pay, no workforce planning or change mgmt; shut 2019, 20,000 jobs).

Ch 2 note pages (pp. 70-75)

Hofstede 6 (country level): Power distance · individualism-collectivism · uncertainty avoidance · masculinity-femininity · long-term orientation · indulgence-restraint. Singapore (class PPT): low PD, collectivist, masculine, low UA, long-term, restraint. Caution: averages are not individuals.

GLOBE + comparison: 9 dims: PD, UA, institutional collectivism, in-group collectivism, gender egalitarianism, assertiveness, future, performance, humane orientation. 6 leader styles: charismatic/value-based, team, participative, humane, autonomous, self-protective. Practices (as is) vs values (should be). Schwartz = individual values; Hofstede = national culture; GLOBE = culture-leadership.

McKinsey 'Great Attrition' (2021): 40% likely to quit; 36% quit with no job; reasons: not valued by org 54%, by manager 52%, no belonging 51% (employers assumed pay). Relational > transactional. 5 fixes: listen, strengthen managers, redesign benefits, career paths, community.

Ch 3 note pages (pp. 116-122)

R3 Resistance as data (Carucci): All resistance = data. Traps: personalising, moralising, rushing. 4 categories: LOSS (name it, honour old way, re-anchor value) · ANXIETY (repeat messages, normalise uncertainty, space for questions) · LACK OF CONTROL (explicit influence, involve early, co-create; avoid faux-inclusion) · FLAWS (curious before corrective, separate signal from tone, adapt plan). Hold the line: name behaviour, separate person from expectation, follow through.

Case 7 Prudence metaphors: Sticky floor · leaky pipeline · glass ceiling · glass cliff · queen bee · mansplaining · double bind · motherhood penalty · second shift · invisible job · imposter syndrome · intersectionality · maze. OB: stereotypes (4.2), FAE (4.3), emotions (3.6), values conflict. Fixes: flexible work, sponsorship, structured appraisal.

Ch 4 note pages (pp. 159-164)

Case 8 Yelp (HBS): 2014: tech >80% male; Yelp ~10% women in tech, 7% Hispanic, 4% Black. Rachel Williams = first Head of D&I; COO in meetings; 2-month listening tour. Hiring funnel: campus -> recruiter screen -> code test -> recruiter score -> Skype audio -> 4 onsite (culture fit) -> 'Stoppelgangers'. Bias: implicit cognition, similar-to-me, voice reveals gender. Fix: structured interviews + rubrics, blind screens, diverse panels, wider campuses, ERGs, data by stage; debate quotas (fairness).

Ch 5 note pages (pp. 198-204)

Case 5 Orix Geoscience (Ivey): Shastri Ramnath: 'culture is the currency of retention'. Flat, fluid roles, O-Code (10 values), peer review incl. CEO. Baseline pay = industry avg; rest customised/negotiable (4-day week, $35K EMBA, course split, babies at work). Survey: 65% want salary raise #1 - she chose $100K Cuba retreat instead; manager rejected poacher ('no annual retreats?'). Dilemma: scale-up needs common, fair systems vs customisation. Theories: Herzberg, SDT, McClelland/Maslow, expectancy (valence high, instrumentality unclear), equity/justice, i-deals. Reco: keep culture, benchmark pay, transparent i-deal rules, codify O-Code, train team leads, re-survey.

Ch 7 note pages (pp. 294-297)

Case 6 Southwest Airlines (WDI): 41 yrs profitable; LUV; hire for attitude, train for skill; employees = first customers; University for People; MIT $25K; NO LAYOFFS; open-book mgmt (Zodiak game); empowered staff; fun (midair wedding). Kelleher: integrity, informality, cards. Pay FA $63,752 vs Delta $42,647 but 2014 union talks stalled ('exploiting loyalty'). Tweet-deplaning blunder. ACSI 78. POB: positive emotions & contagion, PsyCap, virtuous leadership, positive climate, PERMA. Harper: use structured situational interviews; hire for PsyCap/EI; fair process in union talks.

Class PPT examples: Tata Group COVID April 2020: build HERO in anxious staff; Tata Trusts healthcare. Infosys + NIMHANS: HR trained as Mental Health First Aiders; physical, emotional, social, digital well-being.
